

Made from one of the fruits with the highest **Vitamin C** content...

Guava tastes like a combination of pear and strawberry.

iTi tropicals Inc.

Tropical Fruit Purees,
Concentrates & IQF Pieces

PRODUCT DESCRIPTION:

Guava fruits are lemon-like, very aromatic, and soft when ripe with a rind that softens to be edible. The seeds are numerous (112 to 535) but small and fully edible. Our purees and concentrates are aseptically processed, creamy in texture with a white or pink color and intense guava flavor.

HEALTH PROPERTIES:

Guava is very rich in vitamin C (300- 700 mg per 100g) and vitamin A. Vitamin C is a powerful antioxidant and anti-inflammatory agent

APPLICATIONS:

- **Juice beverages alone or in a variety of combinations with other fruits.**
- **Bakery fillings and ice cream**
- **Jams, jellies, preserves**
- **Guava pieces as an addition to fruit salads**
- **Sauces and cereal bars**
- **Guava paste (guava puree, sugar, pectin, and citric acid cooked slowly to a gel)**

SENSORY EVALUATION:

Smooth creamy texture, natural high guava flavor, and fresh guava aroma. Due to its high Vitamin C content, guava has an inherent and distinctive acidic flavor profile.

iTi's GUAVA PRODUCTS:
